

Sign Tips and Sign Return:

1. Push signs into the ground using the base-stand. Please don't push them into the ground using the round yellow Coroplast, as this damages signs.
2. Tie balloons to the base-stand of the sign. Don't tie balloons to the arrows or arrow stands, as arrows are light and can sometimes float away.
3. Please wipe off soiled signs with a damp cloth or baby wipe before returning.
4. Return your signs without twist ties and leaving the stands attached to the signs & arrows
